# individual displays

Profile cut stands or bespoke point of sale units, all made from recycled materials.

Individual designs to create maximum visual impact ...with minimum environmental damage!

From wine racks to desks; cut out figures to animals - even a 3 metre high giraffe!

Send us a sketch, and we'll tell you what's possible.

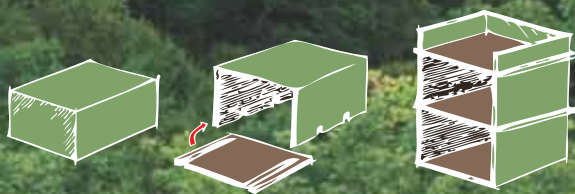

# eco-wood banner

Retractable roller banner stand manufactured from sustainable bamboo wood, with a graphic made from recyclable polypropylene printed using water based pigmented inks.

# eco-roller banner

Traditional roller banner stand made from up to 80% recycled aluminium. With a recyclable polypropylene graphic printed using water based pigmented inks.

## Posters

Using paper only from renewable, sustainably managed forestry sources. With FSC or PEFC accreditation these are the most environmentally friendly papers to use for large format print.

## Mounted Prints

Display mount board contains 80% recycled material. As strong and durable as traditional Foamex board. Recycled 'black' material makes up 80% of the sheets composition. This is faced with a thin layer of virgin material for print mounting. 100% recyclable.

## Bio-Flex Banners

Introducing the world's first truly bio-degradable PVC banner material. Made from non-toxic elements. As strong and tough as traditional PVC, this material will start to bio-degrade when starved of oxygen in a landfill site - within 3 to 5 years the banner will turn to dust.

Long lasting outdoor displays, without leaving a legacy of waste for future generations to deal with.
